

## External Plagiarism Prevention Service

Print a copy of [MyDropbox instructions](#) and then go to [www.mydropbox.com](http://www.mydropbox.com) to get started.

### **What is the benefit of submitting a paper?**

Properly citing and paraphrasing references is challenging! MyDropBox.com evaluates work products for *both* proper citations and the use of outside sources. The Originality Report that you will receive highlights text that you may want to revise to avoid the appearance of improperly paraphrasing published material or incorrectly citing someone else's words. MyDropBox.com can provide you with valuable feedback that will help you ensure the integrity of your work.

### **How do I interpret the Originality Report?**

MyDropBox.com Originality Reports utilize a color-coded system highlighting text that warrants further investigation and providing a link to the Internet source that mirrors the text used in the learner work product. View a [sample report](#) and learn more about the Originality Report that you will receive when you use MyDropBox.com.

The Originality Report serves as a learning tool, and is not a fail-proof assessment of the appropriate use of outside sources. Given the nature of the logic behind the MyDropBox.com system, the tool occasionally flags language that is closely mirrors that from an outside source (certain paraphrased language, for instance) but does not constitute the inappropriate use of the material. All Originality Reports should be closely examined and carefully interpreted.
